Illustration of what people imagine Mu to look like

Mu, also known at the *The Land of Mu*, *isle of monsters*, *the isle of mists*, the *mythical island* or *the cradle*, is a landmass south-east of Bia Thin and Asatta.

Legends

Mu is not a topic people speak about openly, for most are deemed lunatics to even believe it exists. Countless attempts were made in the past by Bia Thin explorers, Asattan ship captains and even by Ilan Quruni expeditions, yet the supposed position where the island can be found always lead to the same result: mist, sea and monsters, and no landmass.

The people of Tenijima are more open to discourse about it, but even they usually warn to drop the idea of going there. "No one who seeks to visit Mu can enter, only those that already set foot onto it can ever return" is a common phrase recited to those who wish to learn more about it or even visit it.

The Isneum hold the believe that their long lost cousins, the Heobihan, still dwell upon Mu. Some say as prisoners, some say as protectors, and others say they wait for their kin to rescue them.

Geography

Cartographers speculate that Mu is of vulcanic origin, based on the descriptions given by the Senzo who escaped from the island and bothered to write it down /

orally offer their knowledge. Due to its position, it can be assumed to have a very heated and damp climate during summers, much like Melukka and the southern parts of Bia Thin.
